

Stop Loss (When Do I Exit A Trade?) FRAN Stock Example

By winkler · July 2, 2020

TL;DR

This blog post discusses the importance of having a trade thesis and knowing when to exit a trade, using the example of FRAN stock. It emphasizes that if the initial trade thesis is no longer valid, it may be time to sell. The post also references other stocks like VERO, JOB, and STAF.

Have a trade thesis and when it's no longer true then it may be time to leave. (If you're a dev think if statements)

FAQ

What is a trade thesis?

A trade thesis is a hypothesis or rationale for entering a trade, based on market analysis and expectations.

When should I exit a trade?

You should consider exiting a trade when your initial trade thesis is no longer valid or if market conditions change significantly.

What stocks are mentioned in the blog?

The blog mentions stocks such as VERO, FRAN, JOB, and STAF.

Is there a video associated with the blog post?

Yes, there is a video linked in the blog post that further discusses the topic.

How can I determine if my trade thesis is still valid?

Regularly review market conditions, news, and stock performance to assess whether your trade thesis remains intact.
